- **BIOLIM Life Science** Nov 2015 - Dec 2015
Junior Research Intern
Host-microbe interaction for developmental and homeostasis maintenance in earthworm
Regeneration is an astonishing phenomenon entailing regrowth of a detached body part. It is a genetic characteristic that is more prevalent in certain animal groups, particularly the invertebrates. Any injury either in the anterior or posterior segments of earthworm leads to a functional loss of the mouth and/or the anus till these organs are restored.
