Razan & Co

2024

Backend Developer

- Built scalable backend systems using PHP and Laravel, improving application performance
- Deployed and configured websites on cPanel and Hostinger, managing file uploads and server settings
- Implemented RESTful APIs, enabling seamless communication between mobile and web applications

PROJECT

Target Dependent Twitter Sentiment Classification-Automatic Features

Twitter sentiment analysis can be improved by using sentiment diffusion patterns. Our proposed algorithm outperforms state-of-the-art methods by 5.09% to 8.38% on Twitter sentiment classification tasks.
