PROFILE SUMMARY

- Proficient in front-end development using HTML, CSS, Bootstrap, and jQuery.
- Strong in back-end development using PHP, MySQL, and CodeIgniter.
- Expertise in building database-driven applications with secure authentication and real-time features.
- Strong knowledge of Git, Linux (Ubuntu), and Windows environments.

RELEVANT COURSEWORK

- Web Development
- Database Management
- Software Engineering
- System Analysis and Design
- Full-Stack Development
- Content Management Systems

TOTAL EXPERIENCE

- I have 2 years of experience in web development, specializing in creating dynamic, user-friendly, and responsive web applications.

EXPERIENCE

NerXpire Technologies, Nagercoil — Junior Developer

Jun 2023 - Present

- **Front-End Development:** Created responsive and visually appealing user interfaces using HTML, CSS, and jQuery. Implemented dynamic features to enhance user interaction and experience.
- **Back-End Development:** Developed robust server-side logic using PHP and the CodeIgniter framework, ensuring efficient data handling and system functionality.
- **Database Management:** Designed and maintained MySQL databases, optimized queries for performance, and ensured data integrity.

Net Access India Limited (Murugappa Groups) — IT Compliance Analyst -- (5 months)

- Installed software for customers with the help of Internet.
- Administered the installation by ensuring the correct configuration of the software and account settings of the software.

PROJECTS

Jewels Airport Transfer | CodeIgniter 3, PHP 7.4, MySQL |

- I worked on the Jewels Cab Booking System using CodeIgniter. My tasks included creating a database for bookings, cabs, and users, building easy-to-use interfaces, and ensuring secure data. I also helped design admin panels and improve the system's performance with real-time booking updates.
- I worked on integrating the Stripe payment gateway for secure transactions.
- I worked on API integration using Postman for testing and debugging.

Niceland (Invoice Management System) | PHP 7.4, MySQL |

- I worked on an Invoice Management System using PHP and MySQL. I built the backend, created user interfaces with HTML, CSS, and jQuery, and added secure login. I also worked on features for creating, editing, and deleting invoices, and added tools to track unpaid invoices.

TECHNICAL SKILLS

- **Front-End Development:** HTML5, CSS3, Bootstrap, jQuery.
- **Back-End Development:** PHP, CodeIgniter, MySQL.
- **Operating Systems:** Linux (Ubuntu), Windows.
- **Version Control:** Git.
