Projects

- **CREDIT CARD FRAUD DETECTION (Using Web development)**
The goal of this project is to use machine learning techniques to improve the accuracy of detecting credit card fraudulent activities. The model will be trained on a dataset of credit card transactions and the goal is to improve the measure called Area Under the Precision-Recall Curve (AUPRC).
- **SMART WEATHER FORECASTING (Using Machine learning)**
Weather Forecasting is crucial since it helps to determine future climate changes. With the use of latitude, we can determine the probability of snow and hail reaching

the surface. We are able to identify the thermal energy from the sun that is exposed to a region.

- **VEHICULAR COMMUNICATION PROPAGATION MODEL (MATLAB)**

A vehicular communication propagation model is a tool used to predict and recreate how signal propagation conditions may perform. It is used to calculate the distance between a transmitter and a receiver.

INTERNSHIP

- Done Internship in **ZRAE GLOBAL** in domain of **web development**
 - Also Done Internship In **AADHTIYA INFORMATION TECHNOLOGY** in domain of **UI/UX designer**

Achievements & Awards

- • Udemy certified python programming developer • Attended 1 month workshop in domain of Data science (Python) • And done intership regarding web development and Data analyst
