PROFESSIONAL SUMMARY

Experienced Web Developer with over 3 years at SOFT SOLUTIONS4U, Chennai, specializing in full-stack development with React and Vue.js. Proven ability to build, maintain, and scale responsive web applications and dynamic websites. Strong background in RESTful API integration, MySQL optimization, and cross-functional team collaboration. Skilled in delivering robust, secure, and cloud-enabled solutions using the LAMP stack.

PROJECT EXPERIENCE

Payrex Web Application

- Upgraded the codebase from Vue 2 to Vue 3 and implemented the Composition API to modernize and optimize application performance.
- Managed Squarespace website design, ensuring optimal UI/UX performance and resolving technical issues promptly.
- Followed a structured development life cycle: planning, development, testing, and maintain the web application.

Technologies: JavaScript, Vue.js, Docker, Bitbucket, JIRA, Slack

VTigerCRM

- **Swiss QR Invoice Generator:** Built a plugin for Swiss QR invoice generation using Sprain REST API.
- **Google Sheets Integration:** Enabled real-time synchronization with Google Sheets using Google Cloud API and Google Apps Script.
- **Label Editor:** Created an interface for admins to easily modify module names, enhancing CRM usability.
- **Technologies:** React, PHP, MySQL, REST API, Google Cloud API, Google Apps Script, jQuery, Bitbucket

Desk Reservation System

- Developed a robust settings menu for managing floors and zones within office premises.
- Implemented user-friendly features for employees and admins to select, assign, and manage work desks.
- Built notification modules to inform users about desk assignments and changes.

Technologies: Laravel, Blade, Bootstrap, jQuery, Leaflet.js, MySQL, Bitbucket

Rathin Tourism

- Integrated Stripe payment gateway to facilitate secure and seamless online transactions.
- Implemented mobile payment support, enhancing user experience and accessibility across devices.
- Collaborated with cross-functional teams to ensure performance optimization and API reliability.

Technologies: React, PHP, MySQL, REST API
