

**Objective:**

Detail-oriented and results-driven PHP Full Stack Developer with over 1.7 years of experience in designing, developing, and maintaining dynamic web applications. Proficient in backend development using PHP with the CodeIgniter framework, and skilled in crafting responsive user interfaces using HTML, CSS, and JavaScript. Experienced in integrating databases, building RESTful APIs, and implementing secure and scalable web solutions. Possess a strong foundation in basic React concepts, enabling efficient collaboration on modern frontend projects. Adept at working across the full development stack and collaborating with cross-functional teams to deliver high-quality, user-centric solutions that drive business outcomes.

**Project Skill Summary:**

- **PHP & CodeIgniter:** Hands-on experience in developing web applications using PHP and the CodeIgniter framework, including routing, controllers, models, and database integration.
- **Frontend Development:** Proficient in building responsive and interactive user interfaces using HTML, CSS, and JavaScript.
- **React (Basic):** Familiarity with React concepts such as components, props, and state management for building modern UI elements.
- **SQL:** Ability to write optimized SQL queries for data manipulation, retrieval, and reporting across MySQL and other relational databases.
- **API Integration:** Experience in creating and consuming RESTful APIs for data exchange between frontend and backend systems.
- **Version Control:** Proficient with Git for source code management and collaborative development.
- **Defect Tracking & Ticketing Tools:** Experience using tools like JIRA and ServiceNow for managing development tasks, bug tracking, and workflow.
- **Development Life Cycle:** Sound understanding of Software Development Life Cycle (SDLC) and Agile methodologies for structured and iterative development.
- **Domains:** Exposure to projects in domains such as Health Care, and Insurance.
- **Database Design:** Collaborated with teams to design and normalize relational database schemas; familiar with star schema modeling practices.

**Educational Qualification:**

B. Tech (Electrical and Electronics Engineering)

Graduation: 2022

PBR Visvodya Institute of technology & Science, JNTU, Ananthapur A.P.

**Key Skills:**

- **Backend Development:** PHP, CodeIgniter Framework
- **Frontend Technologies:** HTML, CSS, JavaScript, Bootstrap
- **JavaScript Frameworks:** Basic knowledge of React
- **Database Management:** MySQL
- **API Development & Integration:** RESTful APIs, JSON, AJAX
- **Version Control:** Git, GitHub
- **Agile Methodologies:** Experience working in Agile/Scrum environments
- **Data Handling:** SQL querying, data validation, and reporting
- **Data Modeling Concepts:** Understanding of relational databases and normalized schema
- **Tools & Platforms:** Visual Studio Code, Postman, Jira, Asana

**Professional Experience:**

Software Engineer : Oneehr Pvt Ltd, Bangalore From Oct 2023 to Till Date

**#Project 01:**

ROLE : Software Engineer

Project Title : Dsdedicare  
Client : DEDICATED SLEEP.  
Environment : Php Myadmin  
Tools : Visual Studio Code, Postman, Jira, Asana  
Team Size : 8  
Duration : January 2023 to Till date.

### Description:

DSDedicare is a healthcare-based application used by multiple sleep centers and healthcare providers in the US. The software is offered on a subscription basis, allowing each office to manage its own patients while the client (Dedicated Sleep) has centralized access to all office data. The system includes various healthcare modules such as appointment bookings, patient exams, treatment history, medication management, patient vitals, and billing.

### Responsibilities:

- Designed and developed dynamic modules using **PHP and CodeIgniter**, supporting features such as appointment scheduling, patient exams, and treatment tracking.
- Built responsive UI components using **HTML, CSS, and JavaScript**.
- Integrated RESTful APIs to support cross-module communication and data flow.
- Wrote and optimized complex SQL queries for data retrieval and reports.
- Collaborated with cross-functional teams to gather requirements and implement new features based on business needs.
- Participated in daily Agile standups, sprint planning, and task tracking using **Asana**.
- Performed unit testing and debugging using **Postman** and browser dev tools.

## # PROJECT 02:

ROLE: Software Engineer.

Project Title : Wheels24r – Used Cars Management System  
Client : Wheels24r  
Environment : PHP, CodeIgniter, MySQL, HTML, CSS, JavaScrip.  
Tools : SQL Developer, Microsoft Power BI,  
Team Size : 4  
Role : Visual studio, Jira, Postman, Bit bucket  
Duration : Oct 2023 to January 2024.

### Description:

Wheels24r is a dynamic, full-stack web application developed for a used car dealership platform. The software includes a public-facing website for customers to browse and buy used cars, as well as multiple portals for **admins**, **buyers**, and **employees**. Employees are assigned specific car listings, and admins manage uploads, subscriptions, and dealer interactions. Dealers subscribing to the platform can list their own cars and access client vehicles.

### Key Features:

- **Dynamic Website:** Showcases listed cars with filters, search options, and detailed car views.
- **Admin Panel:** Full control over inventory, employee mapping, dealer management, and subscriptions.
- **Buyer Portal:** Allows buyers to register, browse cars, and schedule inquiries or test drives.
- **Employee Login:** Displays mapped cars and enables management of assigned listings.
- **Dealer Access:** Subscription-based model allowing external dealers to list their own cars.

### Responsibilities:

- Developed and maintained the full application using **PHP with CodeIgniter**, including database schema design and backend logic.
- Created responsive frontend pages using **HTML, CSS, and JavaScript**.
- Built role-based authentication and access control for admin, employees, buyers, and dealers.

- Implemented car upload and image handling features with validation and dynamic rendering.
- Integrated car mapping features and subscription logic for dealer accounts.
- Worked in Agile sprints and documented deliverables using **Jira** and **Asana**.

Additional Information:

Languages: [ENGLISH, TELUGU, HINDI]

Hobbies and Interests: Reading books and learning new Technologies.

Declaration:

I hereby declare that the information provided in this resume is accurate and true to the best of my knowledge and belief. I understand that any false information or misrepresentation may lead to the rejection of my application.
