Dattendriya Data Science Solutions India Private Limited, Salem(December 2018 – May 2019)

Title: Self-Serving Health Care Mobile Application Development Using React Native and Firebase

Language: React Native

Server: Firebase

Project Involved:

The objective of this application is to record and keep track of the health and wellbeing of an individual. The data from these devices will be updated to this application and this will keep track of historical data as well. So, based on this application we can know the trajectory of an individual's wellbeing. In addition to that users can register their weight, blood pressure, sugar levels, and other medical conditions. These data will be used to give them an overview of their progress by using some charts like bar and pie.
