### PROJECTS:

---

#### WordPress Projects

**Project Title :** TPP General Store

**URL :** <https://www.tppgeneralstores.com/>

**Description :** TPP General Stores is a static WordPress-based website designed to display shop details and showcase products. It does not include any online ordering or purchasing features. The site provides a clean layout, smooth navigation, and mobile responsiveness, offering visitors a simple way to view available products and store information.

**Project Title :** Saree Express

**URL :** <https://www.sareexpress.com/>

**Description :** Saree Express is a WordPress-based e-commerce website developed for selling traditional sarees online. The site features a user-friendly design, seamless product browsing, secure payment integration, and a smooth checkout process. Optimized for both desktop and mobile devices, it offers customers a convenient and enjoyable shopping experience for a wide variety of sarees.

**Project Title :** Amohaa Mobiles

**URL :** <https://amohaamobiles.com/stg/>

**Description :** Amohaa Mobile is a static WordPress website developed using WPBakery Page Builder to showcase shop details and product information. The site features a clean and organized layout, designed to be fully responsive and mobile-friendly, ensuring a smooth viewing experience across all devices. It is focused solely on displaying product details without any e-commerce or ordering functionality.

**Project Title :** Sri Balaji Lights

**URL :** <https://sribalajilight.com/stg/>

**Description :** Sri Balaji Lights is a static WordPress website built using WPBakery Page Builder to showcase various lighting products. Designed with a clean layout and responsive design, the site presents product details and store information across well-structured static pages. It is not an e-commerce website and does not include any online purchasing or ordering features.

**Project Title :** Book My Learn

**URL :** <https://www.bookmylearn.com/>

**Description :** Book My Learn is an education-focused website created with WPBakery Page Builder. It features a responsive design, dynamic layouts, and interactive elements, ensuring a seamless and engaging user experience. Perfect for educational service providers seeking a robust online presence.

## PHP Projects

**Project Title :** Student Management Tool

**URL :** <https://bookmylearn.com/management/login.php>

**Description :** Crafted as a PHP project, this student management tool addresses administrative requirements by streamlining student data management, fee collection, and reporting processes. Administrators can securely log in to access comprehensive student information, generate insightful reports, and seamlessly store data within MySQL.

**Project Title :** Waytobank

**URL :** <https://waytobank.com/>

**Description :** Developed the WaytoBank website to offer a comprehensive range of financing solutions. This project was built using core PHP, vendor modules, jQuery, and JavaScript. The platform is supported by an experienced and knowledgeable team, aiming to optimize clients' cash flow and increase cash management efficiency. The website ensures a seamless user experience and robust functionality to support financial operations effectively.

**Project Title :** Amohaa Web Services

**URL :** <https://amohaa.com/>

**Description :** Amohaa Web Services is a custom-built website developed using HTML, CSS, Bootstrap, and JavaScript on the front end. It offers services such as domain registration, web hosting, bulk SMS, and WhatsApp bulk messaging. The site features a clean, responsive design and integrates with third-party APIs to deliver seamless functionality. It serves as an informative and user-friendly platform for clients seeking reliable digital communication and hosting solutions.
