PROJECT DETAILS

1. **Project Title:** CHITFUND Software.

Chitfund Software is built using the Laravel PHP framework. The web design utilizes HTML, CSS, and Bootstrap, with additional functionalities implemented using jQuery and AJAX. All functionalities are developed using the Laravel 8 framework, and the software uses a MySQL database for various calculations and queries.

2. Project Title: THEJO Software.

- THEJO Software is built on the PHP Laravel 8 Framework. This project is used in industries for PLC device access, serving as a bridge to communicate with microprocessor devices via API, sending and receiving data from the MySQL database..
- The project includes full frontend and backend support and project coordination, utilizing a MySQL database.

3. Project Title: VANIGAN Software.

- Vanigan Software is built on the PHP Laravel 8 Framework. This software facilitates communication among people, including features like adding team members, staff management, and various modules based on the Khatabook concept. It provides login authentication, session management, and the ability to send emails to customers.
- The project also integrates a payment gateway and uses WATI messages to communicate with customers.

4. Project Title: DEVINE Software.

- DEVINE Software is built on the PHP Laravel 8 Framework. This project is based on the E-mart concept, allowing users to shop for products, add items to their cart, and make purchases using the "Buy Now" feature. It also includes a payment gateway.
- A MySQL database is used to store the data for this e-commerce project.

5. Project Title: OFFICE TIME HRMS Software.

- Developed a comprehensive Human Resource Management System using Laravel to streamline core HR operations.
- Key modules included employee management, shift scheduling, task tracking, payroll processing, and allowance mapping.
- Implemented features like dynamic multi-tenancy, Google Maps-based location tracking, and AWS DynamoDB integration.
- Enhanced user experience with responsive Blade UI, real-time notifications, and role-based permission control.
- The system optimized HR workflows, reduced manual overhead, and supported scalable, company-specific configurations.
