## **PROJECTS:**

---

### **PHP Projects**

**Project Title :** Student Management Tool

**URL** : <https://www.bookmylearn.com/management/login.php>

**Description :** Crafted as a PHP project, this student management tool addresses administrative requirements by streamlining student data management, fee collection, and reporting processes. Administrators can securely log in to access comprehensive student information, generate insightful reports, and seamlessly store data within MySQL.

### **WordPress Projects**

**Project Title :** Book My Learn

**URL** : <https://www.bookmylearn.com/>

**Description :** Book My Learn is an education-focused website created with WPBakery Page Builder. It features a responsive design, dynamic layouts, and interactive elements, ensuring a seamless and engaging user experience. Perfect for educational service providers seeking a robust online presence.

**Project Title :** Dalztek

**URL** : <https://www.dalztek.com/>

**Description :** Dalztek IT Company Services Pvt. Ltd. utilizes WordPress as the foundation for its website, integrating essential plugins such as Page Layer for dynamic page layouts and Contact Form for seamless communication. Additionally, jQuery enhances user interactivity, ensuring a smooth and engaging browsing experience.

**Project Title :** sareexpress

**URL** : <https://www.sareexpress.com/>

**Description :** sareexpress is a fully-featured eCommerce platform developed using **WordPress + WooCommerce**, designed to sell traditional sarees online. The website offers an intuitive shopping experience with product variations, secure checkout, and order tracking. Built with scalability and user experience in mind, SareeX empowers store owners to manage their online business effortlessly through a robust WooCommerce backend.

**Project Title :** Tppgeneralstores

**URL** : <https://www.tppgeneralstores.com/>

**Description :** TPP General Store is a static WordPress website designed to showcase store details, product categories, images, and contact information. It serves as an online presence for the store without eCommerce features. The site is responsive, user-friendly, and highlights the store's offerings, location, and customer engagement through a clean layout.

**Project Title :** amohaa

**URL** : <https://www.amohaa.com/>

**Description :** **Amohaa is a professional web service platform** developed using HTML, CSS, Bootstrap, and JavaScript. It offers web development, SEO, digital marketing, and IT solutions. The site features a responsive design with integrated WhatsApp and bulk SMS APIs to improve client communication. Amohaa focuses on delivering custom digital services to help businesses grow their online presence effectively.
