PROFILE

Highly skilled PHP developer with 3 years of hands-on experience in designing, developing & deploy web applications. Proficient in PHP, Laravel, CodeIgniter, and MySQL, with a strong understanding of HMVC architecture and development. Adept at creating scalable, high-performance solutions while ensuring code quality and security. Passionate about learning new technologies and optimizing applications for maximum efficiency.

WORK EXPERIENCE

eNoah iSolution india pvt ltd 2022 - PRESENT

Senior Associate

- Designed and developed a custom **Employee Lifecycle Management** System using PHP (CodeIgniter), MySQL, and JavaScript to automate processes like employee onboarding, promotions, and terminations.
- Built role-based access modules to handle employee data securely, ensuring HR workflows were compliant and auditable.
- Created reusable backend components for integration with third-party tools like payroll, attendance, and document verification systems.
- Developed dynamic dashboards and reports to track lifecycle stages, reducing manual HR interventions by over 40%.
- Implemented automated notifications and approval flows for departments (HR, Admin, IT) based on employee status changes.

KEY ACHIEVEMENTS

Efficiency Improvement

- Implemented innovative, out-of-the-box solutions to complex project roadblocks, streamlining development workflows and accelerating project delivery timelines by 20%.

User Engagement Increase

- Implemented personalized user dashboards and automated notifications, which led to a 40% boost in active employee interactions with the system during onboarding and promotion stages.

STRENGTH

• Problem Solving Skills

Skilled in solving complex challenges with strategic solutions, boosting project efficiency.

• Technical Proficiency

Proficient in PHP, CodeIgniter, Laravel, JavaScript, HTML, CSS; proven success in delivering robust web applications
