- **Web Technologies:** PHP, HTML, CSS, CodeIgniter, jQuery, JavaScript, Python (basic)
- **Databases:** MS Access, MySQL
- **Other:** SEO

Project Experience :

Project Name: NSB North Sydney Bears

Objective: This project involves developing a shopping website and membership plan for an Australian client. The site enables product sales and membership purchases, with an admin panel for setting shipping charges, managing game products, and maintaining inventory. Memberships for game events are also provided, along with a shipping facility through Australia Post.

Company Name: Pulse Solutions Pvt Ltd

Software: CodeIgniter, Database: MySQL

Project Name: DMK

Objective: This extensive system, already developed by our company, facilitates the assignment of doctors for skin treatments. It includes multiple roles, such as superadmin, admin, and account manager, displaying appropriate data based on user roles.

Company Name: Pulse Solutions Pvt Ltd

Software: CodeIgniter, Database: MySQL

Project Name: MrAccuracy Report

Objective: In this project, I implemented requirements and updates for a research report management system. We added an inquiry form with required fields, allowing inquiries to be sent to the site owner for further action.

Company Name: Blue Touch Marketing Solutions

Software: CodeIgniter, Database: MySQL

Project Name: MARC (Cloudbase Project)

Objective: ESL is a product-based company that offers a solution for displaying consumption meter reports and monitoring fluctuations in meter readings. The product also provides analytical reports and pivot reports for in-depth analysis.

Company Name: ESL (Energy Solution Labs)

Software: CodeIgniter, Database: MySQL

Project Name: Rconnect

Objective: This software is designed for storing SAP data. Each night, a cron job retrieves production-related data files from SAP and stores them for internal purposes. My role involves updating features based on the manager's advice.

Company Name: Rishabh Instrument (ESL)

Software: PHP, Database: MySQL
