## **Objective:**

Senior Full Stack Developer with 4 years of experience in JavaScript, Laravel, and AngularJS. Strong team player with a focus on collaboration, problem-solving, and delivering scalable solutions. Looking for an opportunity to grow while contributing to impactful projects.

## **Senior Full Stack Developer:**

- Developed and optimized web applications using **AngularJS** for dynamic UI experiences.
- Designed and implemented **RESTful APIs** with **Laravel and PHP** to support frontend applications.
- Integrated **OAuth2** authentication for secure user logins and third-party API access.
- Managed database architecture and optimization using **MySQL**.
- Lead a team of developers, ensuring best coding practices and high-quality deliverables.
- Implemented version control workflows using Git, including branching, merging, and pull requests to streamline collaboration and ensure code quality.

## **Technical Skills:**

- **Frontend:** JavaScript, AngularJS, HTML, CSS.
- **Backend:** PHP, Laravel
- **Database:** MySQL
- **Others:** REST APIs, OAuth2, Git

## **Education:**

- BE (CSE) from Adhiparasakthi Engineering College, Melmaruvathur 2020.

## **Work Experience:**

- Worked as Full Stack Developer at **Netaxis IT Solution** company, Chennai from **April 2021 to June 2025**.

## **Project details:**

### **Project 1:**

**Project:** TrackMyBills (trackmybills.io)  
**Environment:** JavaScript, AngularJS, PHP/Laravel  
**Database:** MySQL  
**Role:** Junior Full-Stack Developer  
**Duration:** April 2021 – July 2022

### **Objective:**

Stay ahead of all your bills by managing your subscription, tracking your warranties and users can be able set alert to get notification through mail.

### **Project Description:**

**TrackMyBills.io** is a web application designed to help users manage all their subscriptions and bills in one centralized platform. The system enables users to easily add and track their active subscription plans, set custom alerts, and receive timely email notifications before a bill or plan is about to expire.

- Centralized management of multiple subscription plans and warranties.
- Customizable alerts for due dates and renewals.
- Automated email notifications to remind users before expiry.
- User-friendly dashboard to view all active and upcoming bills in one place.
- Improves financial planning and reduces missed payments.

### **Project 2:**

**Project:** TrackMyDomains (trackmydomains.io)  
**Environment:** JavaScript, AngularJS, PHP/Laravel  
**Database:** MySQL  
**Role:** Junior Full-Stack Developer  
**Duration:** August 2022 – June 2023

### **Objective:**

Developed a centralized web-based system enabling users to manage, monitor, and organize all their domain names from a single dashboard.

### **Project Description:**

TrackMyDomains.io is a thoughtfully designed tool that streamlines domain management for both casual users and professional domain investors. Its features — from centralized tracking to team approvals — ensure domains are easy to monitor, renew, and manage efficiently.

- Access and manage domains from any registrar in one place. No more juggling multiple registrar accounts.
- Track domain status and receive customizable reminders for renewals, so you never risk losing a domain.
- Enables team collaboration by streamlining approvals for new domain purchases or renewals.

### **Project 3:**

**Project:** NamePage (name.page)

**Environment:** JavaScript, AngularJS, PHP/Laravel

**Database:** MySQL

**Role:** Senior Full-Stack Developer

**Duration:** July 2023 – June 2025

### **Objective:**

**Name.page** is a modern personal branding platform focused on enhancing how individuals and teams present their names, pronunciation, and profiles through engaging digital touchpoints—particularly useful in avoiding name mispronunciations and fostering clearer communication.

### **Project Description:**

- **Personal Branding Hub:** Record and showcase the correct pronunciation of your name alongside a personal bio—ideal for networking, remote introductions, or building your presence.
- **Name Pronunciation Dictionary:** A crowdsourced database where users can listen to, practice, request, or contribute pronunciations of names—complete with gamification features like IQ points, badges, and certificates for contributors.

### **Roles & Responsibilities:**

- Designed and implemented a **name pronunciation view page** to enhance user accessibility and personal branding.
- Integrated **Microsoft Azure Cognitive Services (Text-to-Speech API)** to generate accurate voice outputs for names.
- Built an **admin approval workflow** allowing administrators to review, approve, and manage user-submitted name and voice records.
- Developed features for **“Trending Names”** and **“Name of the Day”** pages to boost user engagement and content visibility.
- Ensured application scalability, security, and optimized performance while maintaining a user-friendly interface.
