WORK EXPERIENCE

PHP Developer (3 Years) Sharesoft Technology

08/2022 - Present

Madurai, India

Achievements/Tasks

- Designed and developed responsive web pages using HTML5, CSS3, and JavaScript, enhancing user experience.
- Built backend systems using PHP and frameworks like CodeIgniter and Laravel, implementing robust solutions for web applications. Collaborated with front-end developers to create dynamic and responsive user interfaces.
- Executed database migrations to efficiently transfer website data, including images and content, to new platforms.
- Integrated third-party APIs (e.g., ServiceTitan, Twilio) for features like job fetching, messaging, and data synchronization. Developed and implemented payment solutions using PayPal (Direct Credit Card Payment) and Authorize.Net.
- Familiar with version control using Git, Enhanced social media connectivity by integrating Google Analytics, Twitter, and Facebook APIs.
- Proficient in integrating and automating processes through APIs, including ServiceTitan API for auto-review functionalities.
- Experienced in leveraging Twilio for messaging services, including sending and receiving messages programmatically.

EDUCATION

B.SC(Computer Science) Sourastra College

2019 - 2022

Madurai, India

Project

- College Event Management System (Technologies Used :HTML, CSS, JavaScript, PHP, MySQL)

HSC AASS Girls Hr.Sec School

Madurai, India

SKILLS

PHP

CodeIgniter

Laravel

HTML5

CSS3

Javascript

jQuery

MySQL

Bootstrap

Responsive Design

Rest API

Git

Ajax

Vue JS

Cscart

wordpress

React

Node JS

PROJECTS

Codeigniter(<https://www.iboosthealthcare.com/>)

- I have developed a project using CodeIgniter for the backend, incorporating payment integration like PayPal(Direct Payment Method) and social media intergrations . The technologies utilized in this project include HTML, CSS, JavaScript, and CodeIgniter.

Laravel(<https://www.goavito.com/>)

- I have developed a project using Laravel for the backend, and also I have worked on the payments part, orders part, and filtering concept in this. The technologies utilized in this project include HTML, CSS, JavaScript, and Laravel and Vue.js.

Laravel and React(<https://dev.appcodemonster.com/>)

- Developed and consumed RESTful APIs in Laravel to enable seamless data communication between the React frontend and Laravel backend. Integrated Laravel as the backend framework to manage business logic, handle routing, authentication, database operations, and API development.

Cscart(<https://salusmarket.it/>)

- I worked on a payment integration process called Mondu, where I implemented functionalities like confirming the payment, retrieving the invoice, triggering a webhook, and checking the payment status.
