CSS, HTML, Bootstrap, AJAX, JQuery, Javascript

Operating Systems

Windows

WORK EXPERIENCE

PHP Full Stack Developer

Nassguard Trading WLL

Leave Management Web Application Technologies: PHP, JavaScript, HTML, CSS, MySQL (*phpMyAdmin*), Cron Jobs, Mail-to

- Developed a leave management system for internal organizational use with separate logins for employees, HR, managers (department-wise), and admin.
- HR adds employee details along with reporting manager, which automatically generates login access for employees.
- Employees can apply for leave through their account; email notifications are sent to HR with a secure link to review without credentials.
- Upon HR action, leave requests are forwarded to the respective manager for approval, with automated email notifications on acceptance or rejection sent to the employee, HR, and admin.
- Implemented leave cancellation and date modification options for employees, HR, and managers prior to the leave date.
- Developed automated reminder emails for upcoming birthdays, work anniversaries, and pending leave approvals using cron jobs, ensuring proactive notifications without manual intervention.
- Built entirely with PHP functions, HTML, CSS, and JavaScript, without frameworks, leveraging Mail-to for automated email notifications.

Media Management System Technologies: PHP, CodeIgniter, *phpMyAdmin*, JavaScript, jQuery, HTML, CSS, Bootstrap, AJAX

2024 Aug – present
Bengaluru, India

- Developed an internal media management platform for organizational users to upload, organize, and maintain product-related media.
- Implemented search functionality to retrieve media using product name or product ID.
- Enabled users to upload media with department-specific access or mark as public to be visible across all user accounts.
- Integrated real-time user-to-user chat to enhance collaboration and communication.
- Implemented role-based access control for secure and restricted usage.
- Coordinated with stakeholders to gather requirements and deliver solutions aligned with organizational objectives.
- Conducted rigorous testing and addressed feedback to optimize platform usability and performance.

E-Commerce Platform for Safety and Construction Products *Technologies:*

WordPress, WooCommerce, PHP, phpMyAdmin, HTML, CSS, JavaScript, Bootstrap

- Managed WordPress WooCommerce backend and customized templates to align with the company's branding and product offerings.
- Developed mobile-responsive HTML/CSS designs for cross-device compatibility.
- Customized WooCommerce to handle a diverse product catalog with advanced filtering and search options.
- Worked with stakeholders to define project goals and deliver a feature-rich platform meeting industry-specific requirements.
- Performed end-to-end testing to ensure seamless functionality across devices and browsers.

Php Web Developer

SBV Technologies Pvt Ltd

Second-Hand Car Platform: FirstMarshall Auto Auction *Technologies: PHP, CodeIgniter, MySQL, JavaScript, jQuery, HTML, CSS, Bootstrap, AWS, PHPMailer*

- Developed a platform showcasing second-hand cars with advanced filters for quick search and better UX.
- Implemented rental and full-payment purchase options to increase sales and user engagement.
- Integrated detailed car information pages for informed decision-making.
- Collaborated with cross-functional teams to ensure feature integration and stakeholder satisfaction.
- Conducted thorough testing and troubleshooting to maintain performance and reliability.

COVID Testing Appointment System: Free Covid Testing *Technologies: PHP, CodeIgniter, MySQL, AWS, JavaScript, HTML/CSS, PHPMailer, DOM Pdf*

- Built a secure login and appointment scheduling system for COVID testing clinics.
- Generated password-protected PDF reports and sent them via email for test results.
- Collaborated with teams to ensure compliance and smooth operation.
- Performed comprehensive testing and resolved technical issues efficiently.

Podcast Aggregator: Rivet360 *Technologies: PHP, CodeIgniter, Spotify Web API, MySQL, Cookies, MailChimp, PHPMailer, HTML/CSS, Bootstrap, AWS*

- Aggregated podcasts, episodes, and shows using Spotify Web API for seamless access.
- Designed user-friendly interfaces and integrated account management for episode tracking.
- Developed detailed podcast agency information pages and enhanced navigation.

2021 Feb – 2024 Aug

Ranipet, India

- Collaborated with teams to optimize performance and functionality.

E-commerce Platforms: Shopify & WordPress Technologies: *Shopify, WordPress, HTML/CSS, Liquid, PHP*

- Customized themes and templates to align with brand identity and product offerings.
- Implemented product catalogs, shopping carts, and secure payment gateways.
- Integrated third-party apps and plugins to meet business requirements.

Trainee/Data Entry

2019 Nov – 2021 Jan
Chennai, India

O Clock Software Pvt Ltd

- Acquired foundational knowledge in HTML, CSS, and PHP, and began progressively working on Laravel projects, building a solid understanding of the framework step by step.

Daily Data Entry Tasks:

- Monitoring product counts on the PrestaShop e-commerce platform and recording the data in Excel spreadsheets. Calculated and analyzed percentage changes to track inventory trends and ensure accuracy.
- Extracted and prioritized patients' emergency contact details from web application forms stored as images. Recorded the prioritized contact details in Excel, corresponding to each patient's name.
- Conducted daily audits on the Stripe payment dashboard to ensure successful processing of website orders. Reported payment discrepancies promptly to senior management or testing teams. Documented and analyzed payment transactions through screenshot capture.
