## SOFTWARE DEVELOPER

7358159020

dominic20020129antony@gmail.com

#3/1A FAKKIR SAHIB STREET CHENNAI-13

### SUMMARY

A dedicated software developer with over 2.3 year of professional experience in both server-side and front-end development. Started as a Server-Side Developer at Appzo Technology, working with TypeScript and Prisma Schema for 4 months, where I focused on database design and back-end logic. Later transitioned to a Front-End Developer role at Ezee Info for 2 year, developing and maintaining UI components and implementing business logic using PHP. Strong problem-solving skills, with a focus on writing optimized and maintainable code.

### PROFESSIONAL SKILLS

*Responsive web design*      *Database Management: PostgreSQL, MySQL*      *Programming Languages: TypeScript, PHP, JavaScript*

*Code optimization, debugging, performance improvement*      *API Development: RESTful API, Postman, cURL*

### WORK EXPERIENCE

#### PHP DEVELOPER

( Aug 2023 - Present)

EzeeInfo Cloud Solutions

- Developed responsive UI components using HTML, CSS, JavaScript, jQuery, and PHP.
- Utilized MySQLyog for database management and query optimization.
- Contributed to two major software solutions:
- EzeeBits: A bus booking app for travel between locations.
  - Worked on the search and booking pages, ticket editing functionality, and various reports.
  - Managed and updated bus layout pages and developed websites for multiple travel operators.
- Ezee Cargo: A cargo management system.
  - Implemented UI changes for daily booking collection, organization, and LR (Logistics Receipt) booking
  - Handled critical business logic for cargo delivery, including mathematical calculations and reporting.
- Worked on security-related aspects of both projects using Vertex Software.
- Successfully managed projects serving over 1000 operators, ensuring functionality and client satisfaction across all modules.

#### GITHUB

- Creating and managing repositories for multiple clients/operators (e.g., EzeeBits, Ezee Cargo).
- Branch creation, merging, and resolving conflicts.
- Listing and managing namespaces or modules in Git for structured task organization.
- Understanding of commits, pull/push requests, and repository synchronization with remote servers

#### CODEIGNITER FRAMEWORK

- Setting up CodeIgniter 4 with PHP's latest thread-safe versions.
- Building and optimizing controllers, models, and views for modular development.
- Using routing, helpers, and libraries effectively
- Writing optimized and maintainable backend logic with robust error handling.
- Implementing CRUD operations, form validation, and session management
- Integrating front-end templates and AJAX for dynamic page interactions.
