

Dear Hiring Manager,

I am writing to express my interest in the PHP Developer position at Ample Future. With over two years of hands-on experience in object-oriented PHP and MySQL development, I have worked on designing, implementing, testing, and supporting modular and reusable code in collaborative team environments.

I have solid experience working with MVC architecture and common design patterns, and I am comfortable using PDO and stored procedures to write complex MySQL queries. My technical skill set includes XHTML, JavaScript, AJAX, and a good understanding of front-end technologies such as CSS and UI best practices. I enjoy contributing across the full development lifecycle, from fixing bugs to designing and deploying new modules.

I am a self-motivated developer who enjoys taking ownership of ideas and converting them into maintainable, well-tested solutions. I value teamwork and actively share ideas to improve code quality and overall output. I also have exposure to web services such as SOAP, which allows me to adapt to diverse technical requirements.

Please find my CV, work samples, and current salary details enclosed for your review. I would welcome the opportunity to discuss how my skills and enthusiasm can contribute to your team.

Thank you for your time and consideration.

Yours sincerely,

Pranav
