Erode, Tamilnadu

## Experience

### Innoraft Solutions

Drupal - 1800GOTJUNK ([https://www.1800gotjunk.com/us\\_en](https://www.1800gotjunk.com/us_en))

- Developed a Headless Drupal backend integrated with a React frontend.
- Implemented API integrations for various services, including Got-junk Booking, Data dog API, and a Chat Bot.
- Integrated Google Analytics for website traffic analysis and Cookie yes Banner for consent management.
- Built reusable components and custom Drupal modules, implemented site theming and language translation features.
- Leveraged key Drupal modules such as Webforms, Layout Builder, Megamenu, Views, and Paragraphs.
- Successfully upgraded Drupal from version 9 to 10.
- Implemented JavaScript functionalities for Geolocation Prompt and Google Tag Manager (GTM).
- Optimized site performance through JavaScript optimization and lazy loading libraries for videos with thumbnails.

### Digital Triumph Private Limited

Laravel - Employee Portal App

Sep 2022 - Feb 2023

Chennai

- Developed a user-centric Employee Portal using the Laravel framework, including features for tracking job views, managing job applications, handling job seeker information, and creating/displaying job posts.
- Optimized Database Performance by designing efficient MySQL schemas and indexing frequently searched job attributes (location, role, salary), reducing search latency significantly.
- Ensured scalable architecture by leveraging Middleware for role-based access control (RBAC), ensuring sensitive employee data remained protected.

## Digital Triumph Private Limited

Custom House Agent Software - Codignitor

May 2020 - Oct 2021

Chennai

- Engineered a comprehensive CHA (Customs House Agent) ERP solution to digitize Import/Export workflows, ensuring 100% compliance with ICEGATE (Indian Customs) electronic filing standards.
- Developed an Automated Document Processing Engine that transformed raw Invoice and Packing List data into standardized Bill of Entry (BOE) and Shipping Bill formats using Core PHP and Laravel.
- Architected a complex Duty Calculation Module that automated the computation of BCD, IGST, and Social Welfare Surcharges, reducing manual calculation errors by 95% and ensuring precise financial reporting.
- Integrated ICEGATE API Gateways to facilitate real-time electronic data interchange (EDI), allowing users to track cargo status from Assessment through to Out of Charge (OOC) and Let Export Order (LEO).
- Designed a Robust Audit & Compliance Module to manage Incentive schemes (Duty Drawback, RoDTEP) and GST/LUT details, ensuring exporters maximized their eligible financial benefits.

### ICM Solutions

Drupal - IPA (government Portal Website)

- Developed the Drupal frontend for an IPA application with SAP backend integration.
- Built an admin panel with dynamic block content management based on user roles and port assignments.
- Implemented user preference settings for accessibility options like font size and contrast.
- Integrated REST APIs for IAM SSO login, DMS uploads, and access to SAP services such as Leave Management and Pensioner Grievance.
- Created custom Drupal modules for API integrations enabling IAM SSO login for various user types to access SAP services.
- Developed user registration and registration status check forms using API integrations.
- Implemented multilingual features and ensured adherence to GIGW and W3C accessibility guidelines.

### ICM Solutions

Chennaiport Official Website - Drupal

- Developed custom Drupal modules for managing Pensioner Grievances, sending bulk SMS to pensioners, and managing tenders.
- Themed frontend static and dynamic blocks for content types like news and galleries.
- Built role-based admin panels for different departments to manage Grievances, SMS communication, and Tenders.
- Integrated APIs for sending bulk SMS and managed content pages with both static and dynamic content adhering to GIGW and W3C Guidelines.
- Implemented cron jobs for managing dynamic vessel data.

### Innoraft Solutions

Drupal - HCL Global Grant

- Developed a custom Drupal module with a service to manage logs for role-based user activities, form activities, content updates, and custom entity events.
- Implemented a batch process for efficient node updates. Created custom Drupal modules to build dynamic banner blocks.
- Developed reusable components and configured data

### Innoraft Solutions Pvt Ltd

Wordpress- Cspace (<https://cspace.com/>)

Custom Development: Engineered and managed custom WordPress functionalities, including creating multiple custom post types and taxonomies (e.g., Reports, Case Studies) to structure content and enhance data management efficiency.

**SEO & Schema:** Implemented advanced SEO features by altering Yoast SEO breadcrumbs via the `wpseo_breadcrumb_links` filter to ensure clean, accurate schema markup and optimal search engine representation.

**Front-End Markup:** Developed a custom shortcode and markup utility for displaying specialized content (such as quote posts), improving content presentation consistency across the site.

**Navigation & Architecture:** Programmatically controlled site navigation by altering menus using the custom Walker class, providing dynamic and complex menu structures beyond standard WordPress capabilities.

**API Integration:** Successfully integrated Google APIs (e.g., Maps, Analytics) into the WordPress environment to extend site functionality and leverage external data services.

**Core Functionality:** Extended and customized core WordPress behavior by writing and maintaining complex logic within `functions.php`, ensuring scalability and maintainability.

## **Innoraft Solutions**

Wordpress - <https://mabrouk.tn/>

- **E-commerce Integration:** Successfully integrated comprehensive WordPress e-commerce functionality (WooCommerce/other platform), handling setup, configuration, and customization of the online retail platform.
- **Performance Optimization (AJAX):** Developed and implemented an AJAXified category filter page, significantly improving user experience and perceived site speed by enabling instant filtering without full page reloads.
- **Data Management & Mapping:** Expertly integrated custom variables and dynamic data across both product listing pages and detailed product pages, ensuring accurate and flexible presentation of complex product information.
- **Quality Assurance & Stability:** Served as a key contributor in bug fixing and platform maintenance, ensuring the stability, reliability, and smooth operation of critical e-commerce features throughout the project lifecycle.

## **Digital Triumph Private Limited**

Wordpress- Psa Singapore (<https://www.singaporepsa.com/>)

1. **Plugin Architecture & Integration:** Managed the integration and customization of critical backend WordPress plugins for PSA Singapore, ensuring seamless interoperability with core theme functionalities and business requirements.
2. **Theming & Frontend Integrity:** Directed theme integration and customization efforts, ensuring visual fidelity, responsiveness, and consistent branding across all pages while maintaining high performance standards.
3. **Custom SEO Implementation:** Implemented specialized SEO strategies and technical optimizations beyond standard plugin settings, enhancing search visibility and ensuring proper indexing of complex or dynamic content.
4. **Custom SEO Implementation:** Implemented specialized SEO strategies and technical optimizations beyond standard plugin settings, enhancing search visibility and ensuring proper indexing of complex or dynamic content.
